See the future in high definition with the new Sightmark Wraith 4-32x50mm Digital Riflescope. Hunt with an advanced 1920x1080 HD sensor, providing full-color clarity in daytime; simply hit the left arrow to switch to night mode - with classic emerald or black and white viewing options. The Wraith comes with a removable 850nm IR illuminator to provide an enhanced nighttime image and accurate target acquisition up to 200 yards. Customize your riflescope with 10 reticle options and 9 color choices to fit your needs. The Wraith features a built-in camera allowing users to record and share videos. 4.5-hours of battery life with 4 common AA batteries and an external MicroUSB port expands options for power. Wraiths also allow video recording and export.
